Covers Replacement Parts and Existing Systems

TEC-17 Adhesive Supply Unit

- Adhesive & Packaging Systems built the original adhesive-based, patch-locking system. It's still the best system in use today!
- Installs directly on Raimann, Skoog, and Plytec systems
- Reduce production costs by increasing production output
- Reduce patch fallout by as much as 80% compared to tape applicators
- The piston pump, which is designed especially for patching, uses plant air to provide consistent adhesive volume, patch after patch
